

Statement of Interest
The Trust for Healthcare Excellence's
Better Health Initiative

I understand that the purpose of the Better Health Initiative is to work with other healthcare professionals to build a coordinated, comprehensive and effective health delivery system.

I understand that this work is based on renewing our collective stewardship for health and healthcare in our communities through direct discussion with colleagues, and through action toward an improved health system. We will actively work for the wise allocation of resources and system design that delivers improved health and healthcare outcomes and lower costs across our society.

The Better Health Initiative is a program of The Trust for Healthcare Excellence. The work is nationally coordinated, locally led, and inclusive of all healthcare professionals.

To this end, I am interested in helping to establish the leadership for a Better Health Initiative (BHI) within my state.
